PROFESSIONAL SUMMARY

Product professional with 7+ years of experience across product ownership, business management, data analysis and education, now completing the AirTribe Product Management Program. Has owned a product roadmap as Product Owner, run Agile sprints, and shipped two live products end to end. Brings hands-on skills in user research, funnel and cohort analysis, PRDs, prioritisation (RICE), North Star metrics, A/B test design and AI-assisted prototyping. Open to Associate Product Manager and Product Owner roles (remote or hybrid).

CORE SKILLS

Product Management: Product Strategy, Product Roadmap, PRD Writing, User Stories, Acceptance Criteria, Backlog Prioritisation, RICE, MVP Design, Go-to-Market, Product-Led Growth, Growth Loops

Research & Analytics: User Research, User Interviews, Personas, Competitive Analysis, UX Audit, Funnel Analysis, Cohort Analysis, Retention Analysis, North Star Metric, KPIs, A/B Testing, Hypothesis Testing, Data Analysis

Delivery: Agile, Scrum, Sprint Planning, Sprint Demos, QA Coordination, Stakeholder Management, Cross-functional Leadership

Tools: Figma, Lovable, Vercel, Generative AI / LLM Prompt Design

PRODUCT PROJECTS

OutLoud — AI English-Speaking Practice App (Shipped MVP, Capstone)

Sep 2026

Live mobile web app: instant-capture-show.lovable.app

- Conducted 6 user interviews and a day-0 baseline survey (mean comfort 1.6/5) to define the problem: students who read and write English fluently but freeze when speaking in front of others.
- Designed and shipped a 5-minute practice loop (prompt, 15s think, 60s unscripted speech, AI coaching, unlimited retake) built with Lovable and a generative AI model.
- Wrote LLM system-prompt guardrails (no scores, no accent comments, strength-first feedback under 120 words) to protect retention for anxious users.
- Competitive analysis found 70% monthly churn among paying subscribers of the category leader, making Week-4 retention the primary success metric; 71% of first users opened a cold link and 1 returned unprompted.

Our House Ledger — Shared Household Expense Tracker (Shipped Product)

Live web app: house-ledger-mocha.vercel.app

- Discovered, prioritised, designed and shipped end to end a live web app that helps couples track shared daily household expenses.

Airbnb India — Growth Strategy, Growth Loops and MVP Prototypes

Jul 2026

- Diagnosed four growth constraints (trust, trip frequency, supply, take rate) and proposed a North Star metric: verified trips completed per active traveller per year.
- Designed 4 MVPs (Proof of Stay, Trust Score, Split & Invite, AI listing copilot), each with a hypothesis, success metrics and kill criterion, delivered as one clickable prototype.
- Built a three-layer revenue model in which the take rate falls from 15.5% to 13% while contribution per booking rises about 10%; prioritised the roadmap using RICE.

Zomato — Funnel, Cohort and North Star Metric Analysis

Jul 2026

- Mapped a 7-stage food-delivery funnel and showed 700 of 837 lost users drop off before seeing a price, shifting focus from checkout to discovery.
- Segmented users into 6 cohorts (discount-only users retained 11% after a year vs 58% for full-price users) and designed a first-three-orders onboarding plan.
- Defined the North Star (monthly repeat delivered orders), guardrail metrics and a metric ladder for 13 hypotheses; 12-month roadmap projects about 21% more orders per 1,000 app opens.

PathFinder — Personalised Learning Recommendation System (PRD)

Aug 2026

- Wrote a PRD with user stories for 3 personas and 10 prioritised functional requirements targeting +25% engagement and +30% course completions, validated through an A/B test.
- Designed a gamified rewards system with anti-fraud rules, defined non-functional requirements (under 0.3s load, 99.9% uptime, GDPR and DPDP compliance) and a system architecture.

StreakSquad — VitaFit Fitness App Retention System (PRD)

- Addressed Day-14 churn with gamification and community challenges (points, streaks, squads, leaderboards), targeting +10-15 pts Day-14 retention and 2 to 4 sessions per user per week.

Additional Case Studies

- **Uber (User Research):** diagnosed pickup failures at malls, campuses and stations; recommended smart pickup points, landmark guidance and priority driver matching.
- **Nykaa (UX Audit):** found product comparison was a bigger pain point than discovery; recommended side-by-side comparison, "Best For" badges and auto-applied coupons.
- **Corporate Learning Platform (B2B SaaS Strategy):** 3-year land-and-expand strategy for 50–500 employee startups, with defensibility through a data moat, HRIS/Slack/Teams integrations and switching costs.

PROFESSIONAL EXPERIENCE

Business Manager — DeMeNew Tech Pvt. Ltd., Hyderabad (Remote) Jun 2024 – May 2025

- Led cross-functional teams toward quarterly goals; tracked business metrics and reported progress to leadership.
- Improved client retention through personalised service and structured escalation handling.

Product Owner & Product Consultant — Tongadive (Remote) Sep 2022 – Aug 2023

- Owned product vision, strategy and roadmap; translated stakeholder needs into user stories and a prioritised backlog.
- Ran sprint planning and sprint demos using Agile methodologies; led product testing and QA, and also managed customer support and marketing.
- Represented the company at CPHI (pharma industry exhibition) and on customer site visits.

Educator — St. Paul's Sr. Sec. School, Barmer & Lucky Bal Niketan Sr. Sec. School, Jodhpur Jul 2018 – Jul 2022

- Authored a grammar book for Classes 1–5 that was adopted as course material; students topped district CBSE board results.
- Migrated classrooms to online teaching during COVID-19.

Account Manager & Administrative Office Specialist — Neerja Modi School, Jodhpur Jul 2016 – Oct 2018

- Ran school-wide events (Annual Day, Sports Day) end to end, managing multiple stakeholders; resolved account discrepancies under tight deadlines.
- Maintained administrative records and a Management Information System (MIS) for school operations.

Data Analyst — Centre for Monitoring Indian Economy (CMIE), Jodhpur Jul 2015 – Nov 2015

- Extracted patterns from data and turned them into actionable recommendations for the Roadways Department.
- Partnered with business leaders to prioritise problems for analysis.

EDUCATION & CERTIFICATIONS

Product Management Program — AirTribe May 2026 – Nov 2026 (expected)

Bachelor of Education (B.Ed.) — Mahatma Gandhi Kashi Vidyapeeth Apr 2019 – Mar 2021

Master's Degree in Commerce — Dr. C. V. Raman University, Kota, Bilaspur Jul 2017 – Mar 2019

Bachelor of Commerce (B.Com.) — Jai Narain Vyas University Aug 2014 – Mar 2017

Certification in Effective Online Teaching Techniques

VOLUNTEERING

Volunteer, girl-child education — Pumpkin Seeds
